

The Rose of Lakeview

Medically monitored programs with holistic integration.

A safe environment for women's unique needs in treatment, healing, and recovery.

Women's Integrated Treatment

In addition to treating addiction, this clinical program addresses cultural and trauma issues that are often present. Our approach treats the whole woman: mind, body, and spirit.

Trauma-Informed Care

More than 70 percent of women in treatment report having at least one significant traumatic event in their life. Our staff members are trained in assessment, grounding skills, eye movement desensitization, reprocessing, art/music therapy, and more.

Beautiful Accommodations

The Rose of Lakeview isn't a typical facility – we've designed warm, tranquil, and spacious spaces to enhance our treatment experience. On top of the design, we take great lengths to keep genders completely separate during treatment so they can focus on what's important – their recovery.
