

FOR IMMEDIATE RELEASE

LAKEVIEW HEALTH FEATURES ALCOHOL AWARENESS CAMPAIGN

April is national Alcohol Awareness month and Lakeview Health is hosting a series of videos to educate the public.

Jacksonville, FL, April 9, 2021— Lakeview Health launched a month- long awareness campaign in April for social media followers and national EAP partners to educate consumers on the dangers and complications from binge drinking and long- term alcohol use.

“Our team of Difference Makers is grateful for the opportunity to educate consumers with a series of short video clips on alcohol use, particularly at a time when the current pandemic environment has driven people to peak levels of anxiety, depression, and excessive alcohol consumption,” explains Chief Medical Officer, Dr. Lantie Jorandby. “Our hope is that it will open up discussions with families or individuals who may be struggling.”

Topics include binge drinking, Alcohol Withdrawal Syndrome and why a detox process is important, the differences on how alcohol affects men and women, generational abuse, and social drinking versus alcohol use disorder.

The campaign can be followed at: <https://www.facebook.com/LakeviewHealthRecovery/>

About:

Lakeview Health is a Center of Excellence in residential addiction treatment, specializing in patients with dual-diagnosis disorders and high medical acuity. Our physician-led multidisciplinary team provides individualized, evidence- based approaches to treating addiction, a complex brain disease marked by periods of remission and relapse. Lakeview programs address all aspects of healing to empower patients to move successfully towards a life of recovery. To learn more, visit www.LakeviewHealth.com.
